BRAVE NEW WORLD

FRACTURE

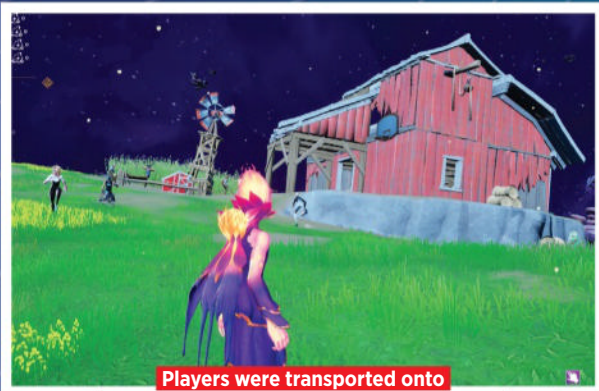

In the Chapter 3 finale, the Loopers fought valiantly against The Herald's chrome attack, but it wasn't enough to save the island from destruction.

Players had a chance to say goodbye to some of our favorite landmarks and moments before the world was destroyed. Then we got to work creating a new island to explore!

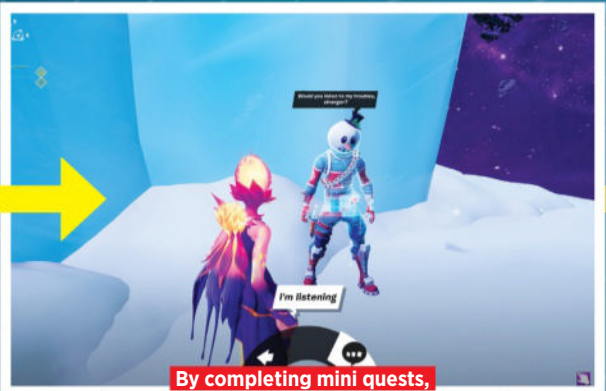

ISLAND OBLITERATED

When The Herald transformed, the island was shattered into hundreds of fragments and sucked into the Zero Point.

Players were transported onto various fragments of the island, floating in the void of outer space.

By completing mini quests, we collected fragments to help reactivate the Zero Point.

AIR RESCUE

As the Season progressed, we saw some buildings suspended in the air with balloons. This gave us hope that at least part of the old map would be preserved in Chapter 4.

CHROME INFESTATION

The Chrome that contaminated the island continued to spread throughout the Season, culminating in The Herald's transformation into a giant Chrome monster!

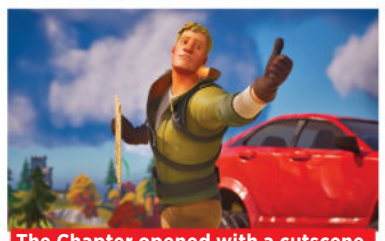

Little by little, the broken pieces of land were pulled back through the Zero Point, merging to create a new island!

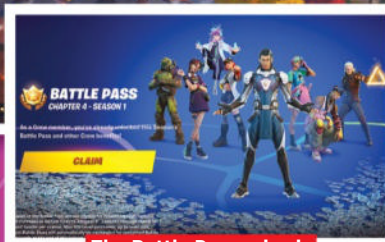

With the help of the Loopers and The Paradigm, a reconstructed map was formed, with both familiar landmarks and brand-new territory to discover.

FRESH BEGINNINGS

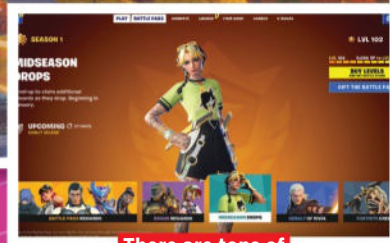

WHAT'S NEW

The Chapter opened with a cutscene, showing off the characters and locations we'll be seeing this Season.

The Battle Pass price is the same: 950 V-Bucks, or free for Crew Members!

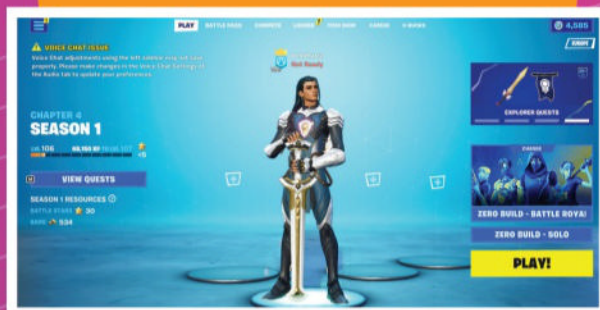

There are tons of awesome rewards to unlock, and even more to come.

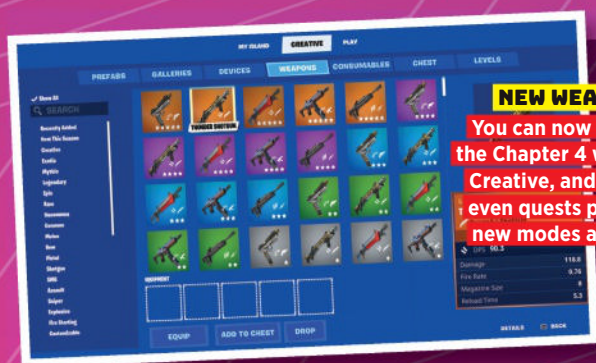

The island was completely destroyed and rebuilt, leaving players with a ton to explore.

A fresh Fortnite Season is always exciting, but there's nothing like the dawn of a new Chapter! Players have a massive map to discover, teeming with landmarks and Points of Interest both familiar and unknown—including locations that are perfect for No Build Mode. On top of everything, the graphics update has the whole world looking more incredible than ever!

SEASONS CHANGE

This Season is a bit longer than usual, which gives you enough time to get familiar with the map and mechanics. We never know what's in store for the island, but we expect the terrain to stay the same for a little while.

NEW WEAPONS

You can now play with the Chapter 4 weapons in Creative, and there are even quests promoting new modes and maps.

GET CREATIVE

Creative Mode got a refresh, but the big changes are still to come...

There was a small update in Creative Mode to include the new Chapter 4 mechanics. However, what we're really anticipating is Creative 2.0: a whole new set of tools that will put Fortnite on par with game creation systems like Roblox.

MAKE YOUR OWN GAMES!

When Creative 2.0 is released, players will be able to create their own Fortnite mini games and events in even higher detail.

GORGEIOUS IMAGES

With the new graphics update, Fortnite is even more vivid and immersive.

Thanks to Unreal Engine 5.1, players using PlayStation 5, Xbox Series X|S, or PC can now experience the island in full glorious detail. Updates to architecture, lighting and shadows really make the world come alive!

CHECK YOUR SETTINGS

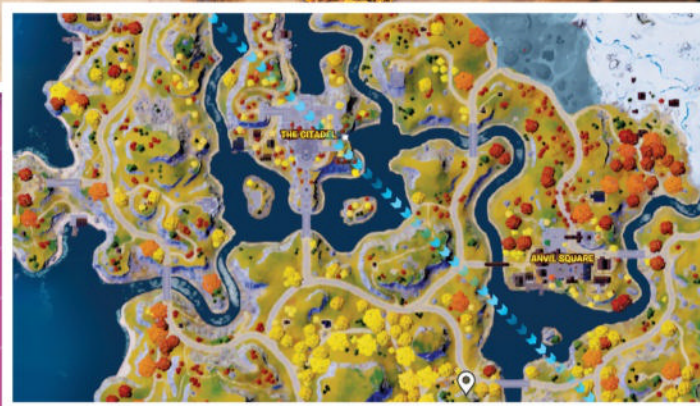

If you're playing on PlayStation 5 or Xbox Series X|S, just turn "120 FPS Mode" off. On PC, it's a bit more complicated—check the official website to make sure your system meets the requirements.

POINTS OF INTEREST

Choosing where to land just got a lot more interesting with two added mechanics.

We've been seeing a lot more action around the new Points of Interest, and there are a few reasons why. First is the addition of Capture Points: highlighted zones within each POI that grant you significant rewards. If you manage to claim a Capture Point by remaining inside the circle for long enough, nearby chests and enemies will be instantly revealed—a huge advantage at any stage of the battle. Hot Spots are another new feature: random zones on the map that contain extra loot. We're loving these changes so far. They add exciting competition to the earliest phases of the game!

HOT SPOTS

Every time you start a game, two random Points of Interest will be marked as Hot Spots. Along with extra chests, these zones spawn flying drones that you can shoot down for more loot. Naturally, they're hotly contested.

STAND YOUR GROUND

Claiming a Capture Point gives you a sizeable advantage, but it can be difficult to stay in one location for a full minute. Unless you have impeccable reflexes, this is probably best attempted as a squad.

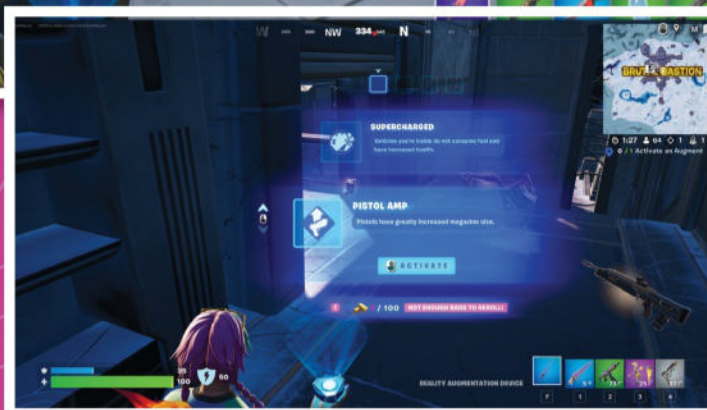

REALITY AUGMENTS

**Nothing keeps
gameplay fresh
like literally altering
your reality!**

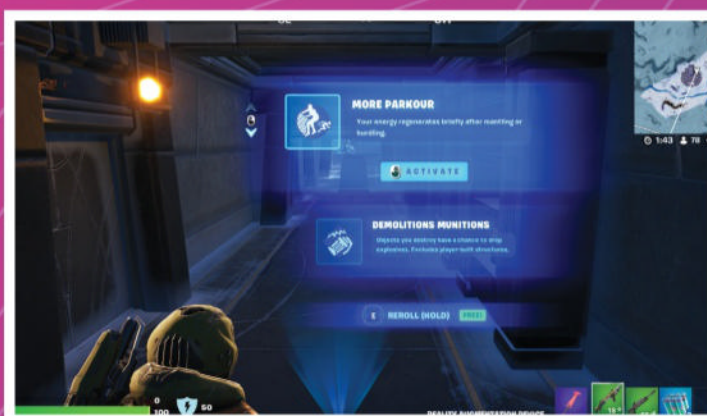

With the Reality Augment system, you'll have the chance to choose brand-new gameplay perks at various intervals in the match, dramatically changing the way you play. There are 22 Augments at the moment, and you'll be given two to choose between.

They range from minor conveniences, like unlimited fuel for your vehicles, to major bonuses—you may be able to redeploy your Glider for the rest of the match or equip a rare and deadly weapon. We're so curious to see how many more Augments will appear throughout the Season. This could be the start of a huge gameplay shift in Fortnite!

TRY YOUR LUCK

The Augments can give you valuable items to use, or they can modify the weapon you already have, granting extra damage or armor.

SECOND CHANCES

If you don't like your choices, you can reroll once for free. You can also use gold bars to keep trying if the odds are seriously not in your favor.

UNCHARTED TERRITORY

Forget everything you know: It's time to learn your way around a brand-new island!

Even compared to previous events and Chapters, this feels like a totally fresh start in Fortnite. Almost everything from the recent Seasons has been replaced, leaving us with so much new content to get familiar with in the months to come. This island encompasses an impressive variety of locations, from snowy tundras to seaside villages and from farmland to deserts. Each landmark has a unique identity, tailored to a vast range of play styles. So far, we're absolutely loving the changes, and we can't wait to see what else is in store!

DIVERSE TERRAIN

There are plenty of areas with farms, forests, small mountains and winding rivers, allowing for even more dynamic and varied gameplay.

ROCKET BUS

We love the new lobby! Since the island is still floating in outer space, the Battle Bus now has a rocket on the back end, launching us toward the island. It's an awesome detail that pulls us deeper into the story.

FREE LOOT!

Memorize the location of these NPCs so you can get extra gear anytime you need.

MEET NEW CHARACTERS

There are 15 non-player characters to interact with around the new map.

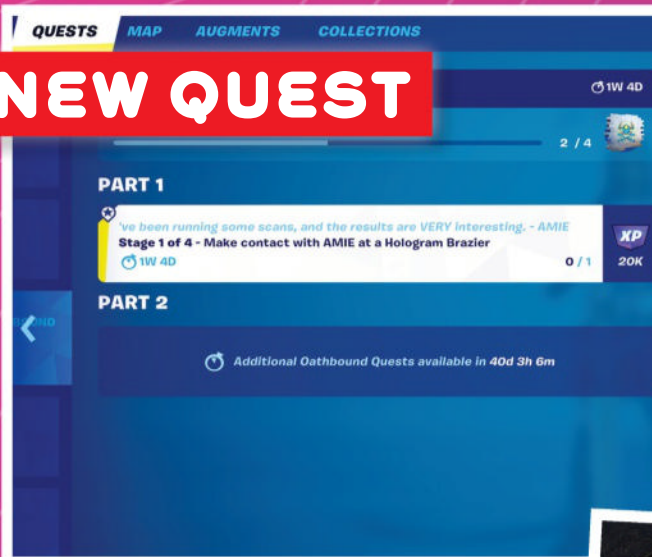

NPCs have become more and more important in each passing Season. Not only can they provide you with free items, but they can also sell you Exotic weapons, and you can even hire them to fight alongside you!

SPEND YOUR BARS

Gold Bars are the only way to get your hands on Exotic items.

NEW QUEST

Quests are the best way to get involved with the Fortnite storyline, and this Season's lore is more vivid than ever.

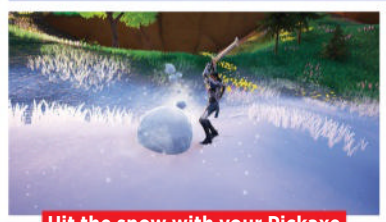

Players can get a true sense of the strange goings-on around the island by completing the Oathbound questline. It's packed with tasks and rewards, plus voice-acted dialogue to narrate your journey.

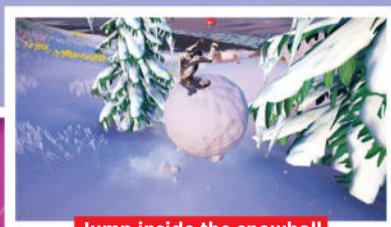

SEAMLESS TASKS

Most of the quests can be easily completed as you play, and your progress now updates automatically. You no longer need to finish a match to fulfill a task.

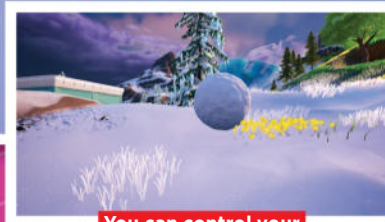

INTERACTIVE ENVIRONMENT

Hit the snow with your Pickaxe to start forming a snowball.

Jump inside the snowball to hide from enemies.

You can control your snowball, ramming it against structures or distracted players!

Make use of the dynamic new landscape for combat advantages.

Players have been able to hide within objects for a while. What's even better, though, is constructing our own hiding places by forming giant snowballs! You can also utilize foliage to restore Health and Shield when using certain Augments. Interacting with the landscape makes the island more exciting than ever before.

AUTUMN AUGMENT

With the new Reality Augments, you can use fallen leaves and other foliage to heal yourself—way more convenient than traditional forageables!

DIRT BIKES!

The Trail Thrasher is a new two-wheel vehicle you can use to zoom around the island. You can ride with a friend, or even fire your weapon while flying solo.

HURDLING

We now have the option to hurdle over small obstacles, maintaining speed at the cost of some energy.

MORE MOVEMENT

The new Chapter offers some updated ways to travel around the island and interact with the world.

Both hurdling and dirt bikes make moving around the map so much fun! Traveling on foot is much more fluid now that we can hurdle, and the agile Trail Thrasher bikes can take on any terrain without sacrificing speed.

UNIQUE ITEMS

Get acquainted with the new collectible materials: You never know when they'll come in handy!

There's still a lot to figure out about the updated island, but the new Kinetic Ore in Shattered Slabs is especially puzzling. Strike the rock to activate its kinetic energy and it will blast out in the direction of your attack! This one will definitely take some practice to perfect.

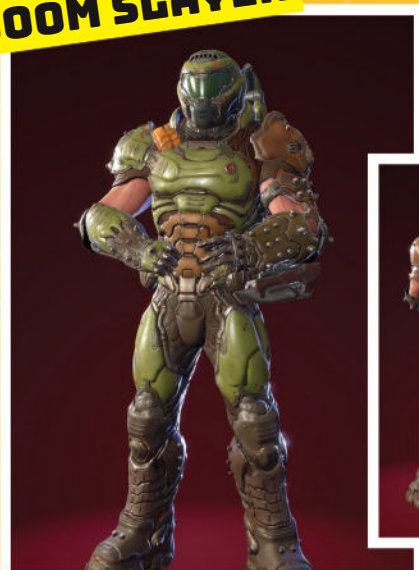

SHOCKWAVE HAMMER

This new weapon is like nothing we've seen before in Fortnite! Use it for quick transportation or to attack your enemies.

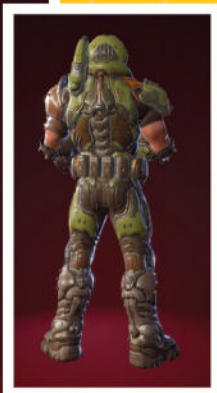

NEW SKINS!

This Season features ongoing collaborations with other franchises we love. This is the first Battle Pass in a while without a Marvel crossover, but Doom Slayer and The Ageless are awesome enough to make up for it!

DOOM SLAYER

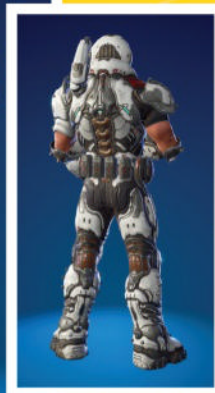

Whether or not you're a fan of Doom, who wouldn't want to charge into battle as a space marine? This epic armor is unlocked at Level 26.

DOOM SLAYER (ASTRO ARMOR)

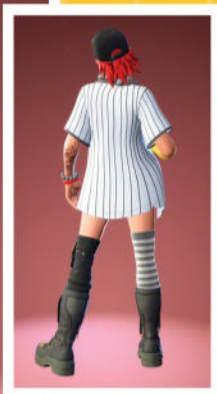

Your Praetor Suit also comes with an alternate style, but we like the iconic look of the original.

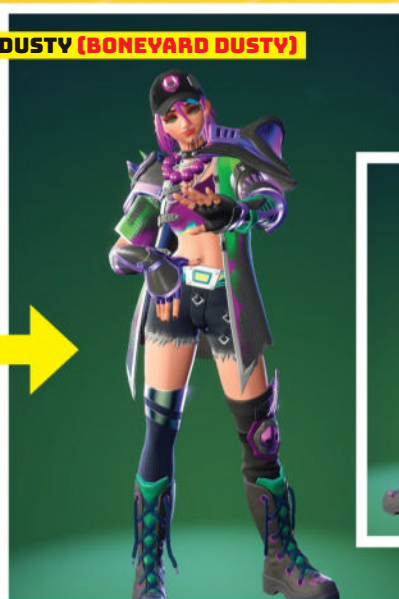

DUSTY

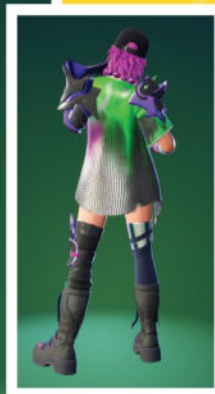

Dusty's baseball-inspired outfit is the perfect blend of sporty and punk. You'll find her on Page 7 of the Battle Pass.

DUSTY (BONEVARD DUSTY)

Reach Level 46 and unlock all items on Page 8 to give her a colorful neon makeover, plus some updated back armor.

HELSIE

HELSIE (BOBARISTA HELSIE)

THIS IS AN IMPRESSIVE SEASON FOR SKINS. NOT ONLY ARE THERE EIGHT INCREDIBLE OUTFITS TO UNLOCK, BUT BOTH THE HULK AND MR. BEAST ARE AVAILABLE IN THE ITEM SHOP!

ANIME FANS CAN ALSO LOOK FORWARD TO THE FORTNITE X MY HERO ACADEMIA COLLABORATION COMING TO THE ITEM SHOP THIS SEASON!

SELENE

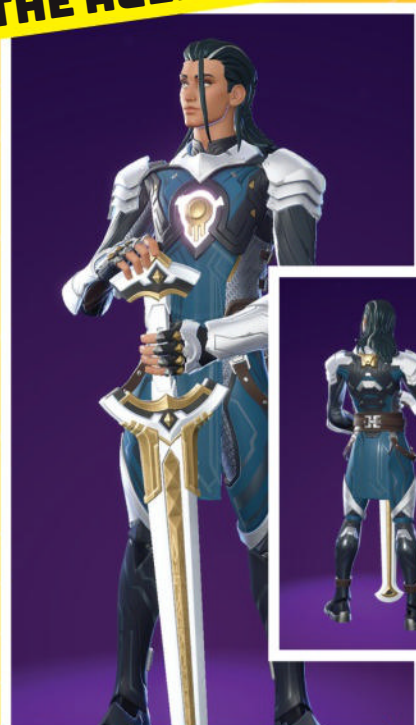

You'll unlock Selene and her pastel outfit as soon as you purchase the Battle Pass.

SELENE (MOONGLOW SELENE)

At Tier 100, you can play as The Ageless: a Snapshot of Geno, the IO's founder, now tasked with guarding the Citadel.

THE AGELESS (CHAMPION)

The fully armored style can be equipped by using the built-in Emote.

THE AGELESS (NO HELMET)

If you prefer to see Geno's face, you can also choose to remove his helmet.

GERALT OF RIVIA

As usual, you'll have to complete a set of quests to obtain the bonus skin.

LANDING GUIDE

BREAKWATER BAY

Located on the northwestern corner of the map, not many players land here since it's on the outskirts of the island, but it does give you access to the coastline and the Citadel.

COASTAL BATTLEMENT

If Breakwater Bay is looking too busy, this is a slightly calmer alternative. You'll find enough loot to get you started before moving on to more populated areas.

COLD CAVERN

There's a decent offering of chests here, but the main draw is an NPC named Snowheart. Talk to her to get a Primal Stink Bow or to learn where the storm is headed—potentially lifesaving information, as you don't want to get stranded in the tundra!

THE CITADEL

This is one of the largest POIs on the new map, and a lot of players are flocking there in the early days of the Season. Why? Because these are the stomping grounds of The Ageless, a Boss that drops an Exotic Ex-Caliber Rifle when defeated. But beware: It won't be an easy fight, so come prepared.

ROYAL RUIN

If you're looking to trade with Wildcard, find him at the Royal Ruin. He can give you an Ex-Caliber Rifle or an Unstable Bow.

ANVIL SQUARE

Near the middle of the map lies a large medieval town. It has a lot of chests and loot, but it's also one of the most contested areas of the map at the moment.

We see the island change between every Season, but a new Chapter means an entirely unfamiliar landscape to get used to! We're having a blast with the reconstructed map, and the added movement mechanics give us new ways to interact with the island, with or without building. Here's our guide to the new landmarks and the best spots for loot, plus some regions to avoid.

CRUDE HARBOR

This is a good backup if you see too many players going for Brutal Bastion. There are a few chests to loot, and Aura will give you a Chug Splash for the road. You can also hire her with enough Gold Bars.

BRUTAL BASTION

One of the most unique (and contested) areas on the new island, navigating this location can be tough, with tall structures on all sides. It's worth the risk though, with plenty of chests for your squad. You'll also find Frozen Red Knight available for hire.

LONELY LABS

Just like the name implies, this area is almost always empty. This can be great if you're hoping to claim the Capture Point, but there aren't many chests to be found in the area and movement might be tricky.

ICY ISLETS

Here you'll run into Frozen Fishstick, who can give you a Shield Keg and a Chili Chug Splash. If you land in Brutal Bastion, make sure to pay him a visit on your way inland.

SLAPPY SHORES

Whether or not this massive area is a popular landing spot depends on the path of the bus, but there's enough loot here for a team of several players. It's divided into a north and south side, so be vigilant about players coming from all directions.

GAME MAP

SEASIDE SENTRY

This can be a decent location if you're trying to get away from Shattered Slabs in the early stages of the game. There isn't much loot, but you can find an Oathbound Chest here, plus some other items along the Rocky Docks landmark below.

SHORE SHACK

If you decide to land here, you'll really need to scour the beach for loot...the pickings are pretty slim. However, this is where you'll find Evie, and it's the only place to get your hands on the Shadow Tracker weapon.

ROWDY ACRES

You can get a couple of chests in this area, then move up to Frenzy Fields and polish off any players left standing. You'll also find Joni the Red here—hire them to help you, or just take the Red-Eye Assault Rifle.

SHATTERED SLABS

This is a large region with complicated terrain to navigate. The loot is also limited (considering the huge area it occupies on the map), so avoid landing here unless you're familiar with the layout or looking for something specific.

FRENZY FIELDS

If you liked the farmland in previous islands, Frenzy Fields is the place for you. This Point of Interest is made up of vast, open plains, humble homes and barns filled with loot.

PLEASANT PASSAGE

Raptorian the Brave can be found here with a Primal Flame Bow for you!

ALTHOUGH THERE ARE ONLY NINE NEW POINTS OF INTEREST ON THE ISLAND, THERE ARE A TON OF OTHER LANDMARKS TO DISCOVER AROUND THE MAP. DILIGENT EXPLORATION CAN PAY OFF—SOME PLACES HAVE NPCs WHO CAN GIVE YOU ITEMS, AND MANY CONTAIN A DECENT COLLECTION OF LOOT.

FAULTY SPLITS

This is a huge and reliable landing spot, with more than enough gear for you and your squad. It's near the middle of the map, making it great for rotations, and the mixed-range environments allow for all types of combat.

SECLUDED SPIRE

If you are looking for a Port-a-Bunker or a Shockwave Hammer, talk to Omega Knight in this location. Aside from that, this landmark can be avoided, as the loot offerings are meager.

BEACHY BLUFFS

If you need to get away from Faulty Splits during your landing, check out Beachy Bluffs. There are a few chests inside the houses here, and you can take advantage of the coastline to travel around quickly.

CUDDLE CROSS TRACK

There's some loot to be found here, but it's too spread out to collect in a hurry. This is a decent pit stop if you happen to be passing through, but don't go out of your way.

EXILE ISLE

If you want to hide out and avoid everyone for the entire match, go to Exile Isle! There are a few chests here, so you won't be leaving empty-handed when the storm forces you to move.

ANVIL SQUARE

Right in the center of the island is Anvil Square, an idyllic lakeside village filled with quaint homes—and hard-core combat!

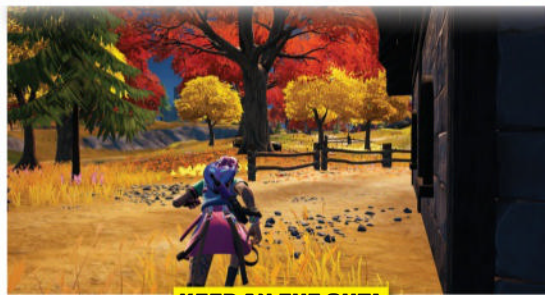

FIRST STOP

This is one area where you can always find a good fight. It's near the middle of the map, making it perfect for escaping the storm, and there's plenty of loot here: There are over 40 locations where chests can spawn, including the new Oathbound Chests.

NOOKS AND CRANNIES

These cramped buildings can be dangerous if you find yourself cornered, but the narrow streets outside give you a perfect position to shoot at players in the Capture Point while remaining protected.

KEEP AN EYE OUT!

There's plenty to do outside the main town square, but don't let your guard down as you head toward the outskirts—other players may be hidden in the rivers and forests.

**RIVERSIDE
RETREAT**

While most players land in the main area of Breakwater Bay, you can also find a smaller settlement near the bridge. If there are too many players around, take refuge here and engage from a distance.

BREAKWATER BAY

Tucked away in the top left corner of the map, you'll find Breakwater Bay, resembling other coastal towns we've seen in Seasons past. This one is a bit more spread out than we're used to—it's best to get your hands on a medium-range weapon right away.

AQUATIC ESCAPE

Check the area near the docks for some chests—you'll also find a motorboat here, which can be used to flee the area in a hurry. Head inland on the river or travel along the coast.

**ARM YOURSELF WISELY**

There's a lot of open space between the large complexes, and even inside some of the buildings, so find a midrange weapon as soon as possible if you want to survive here. Luckily, there aren't too many players here at the top of the map, making it a good spot for some more casual gameplay.

BRUTAL BASTION

Nestled in the snowdrifts of the icy northern region lies the headquarters of the Reality Warriors. This sturdy compound has an imposing appearance and contains enough loot to supply your whole team with gear.

ARMORED ARCHITECTURE

This is one of the coolest areas on the new map (no pun intended)! Incredible atmosphere aside, this is a practical landing choice as well, with tons of chests to discover within the solid walls.

GET YOUR BEARINGS

This is not an easy area to navigate, even if you've been here before. Each structure has many floors, and other players can spot you from any neighboring building.

ON THIN ICE

Walking on the slippery ice can be treacherous, as it becomes harder to control your character's movement. Be careful when fighting here—one wrong step can make you an easy target.

**SQUAD LANDING**

This compact area is divided into two zones, each filled to the brink with loot and chests. If you like playing with friends, this is a great place to land. Don't forget to check for chests on the cliffs.

FAULTY SPLITS

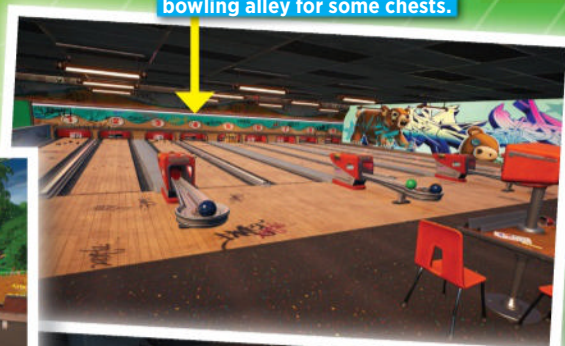

This bisected neighborhood reminds us of the old Retail Row. You'll find houses on the hilltop and mostly commercial spaces below—both are solid places to land.

LOTS TO DISCOVER

No matter where in the area you end up, this is a fun part of the map to explore. Check the new bowling alley for some chests.

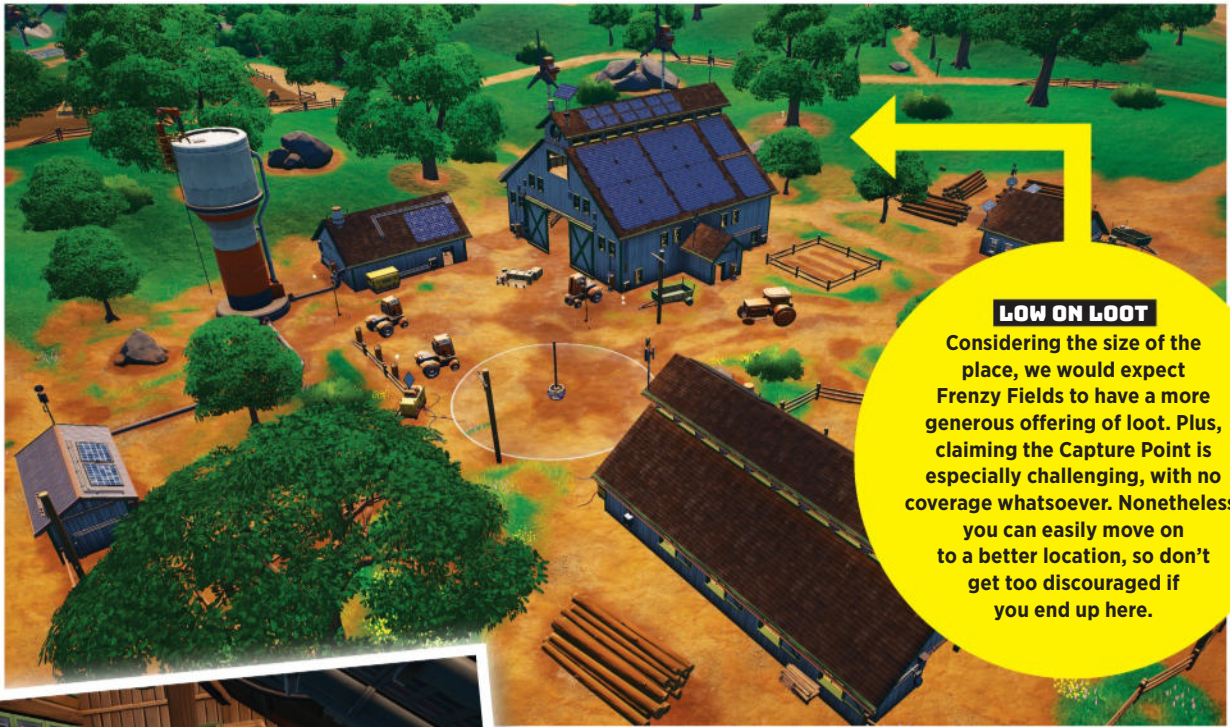

**FRESH FRANCHISES**

It's always amusing to see shops and businesses popping up around Fortnite, adding to the strange lore of the island. These are also great places to find gear, so bring along some friends.

FRENZY FIELDS

You can't have a Fortnite island without a farm, and this Season gives us Frenzy Fields. If you've ever landed in Frenzy Farm or any of its predecessors, you know exactly what to expect here!

LOW ON LOOT

Considering the size of the place, we would expect Frenzy Fields to have a more generous offering of loot. Plus, claiming the Capture Point is especially challenging, with no coverage whatsoever. Nonetheless, you can easily move on to a better location, so don't get too discouraged if you end up here.

TAKE TO THE LAKE

You can use the waterway near Frenzy Fields to catch some fish. This is a great way to restore some health after the dust has settled.

KEEP YOUR DISTANCE

Though there are a few residential buildings around, most are barns with large open interiors. If you encounter other players inside, get ready for a long-range, drawn-out fight.

**EDGE OF NOWHERE**

Lonely Labs is in the top right corner of the map, with nothing nearby except for Brutal Bastion. Rotating out of this place is tricky due to the barren, icy landscape, and there isn't enough loot to fully supply a team. Only land here if you're playing solo and looking for a slow start.

LONELY LABS

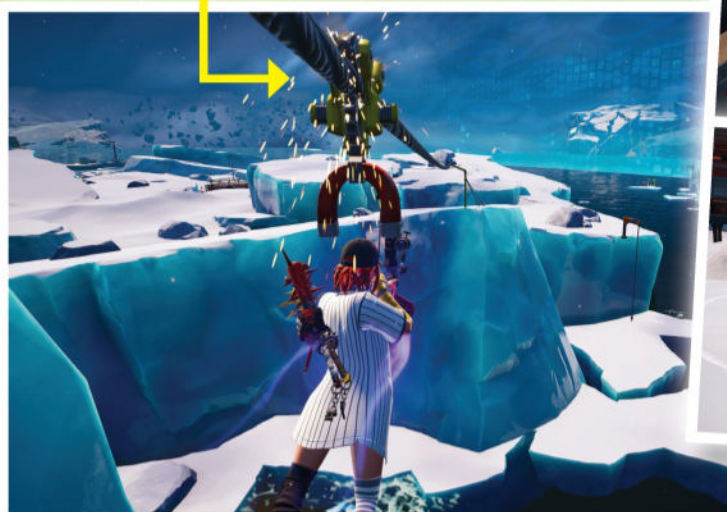

The name is certainly fitting—almost no one lands here, as it's dangerously secluded and there isn't much loot to be found. If you're looking for a quiet hideaway, try it...but be prepared to run when the storm comes.

CAPTURE THE CENTER

With so few people around, you have a good shot at securing the Capture Point. Odds are you won't see anyone nearby, but a good midrange weapon is all you need to fend off any incoming challengers.

ZIPLINE FOR YOUR LIFE

Movement in this area isn't easy. There are lots of cliffs and holes in the ground that make it tricky in Zero Build. You'll need to make good use of the Zipline system to move in and out efficiently.

SHATTERED SLABS

An expansive, difficult-to-navigate area, this location has plenty of alcoves for enemies to hide in and wide-open spaces that leave you vulnerable to snipers.

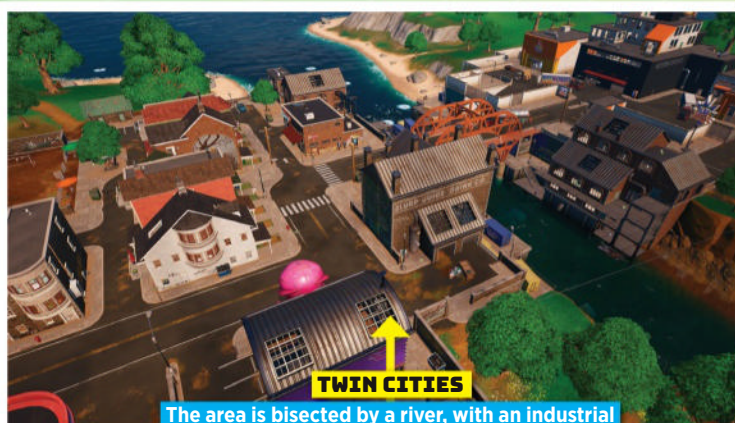

KINETIC ORE

If you want to check out the Kinetic Rocks, this is the place to be. With a huge area to cover, the loot is pretty spread out around here. This can be a tough region to survive, so avoid it until you're feeling confident.

SLAPPY SHORES

You'll find this town is brimming with chests and loot, making it a great spot for a team landing. It's divided into two neighborhoods.

TWIN CITIES

The area is bisected by a river, with an industrial factory zone on one side and houses on the other. There's plenty of loot to be found in both regions.

EXPLORE THE FACTORY

This is where you'll find the Slap Factory, where the new consumables are produced. Whether you're looking for Slap Barrels or just want to explore the new location, land on the south side of Slappy Shores.

PICK YOUR BATTLES

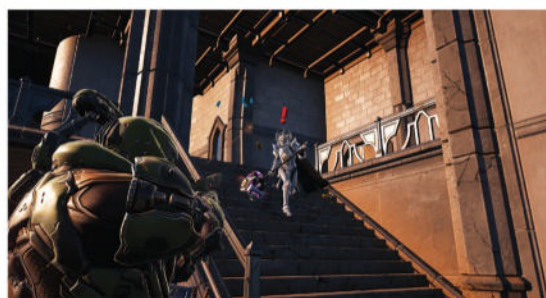

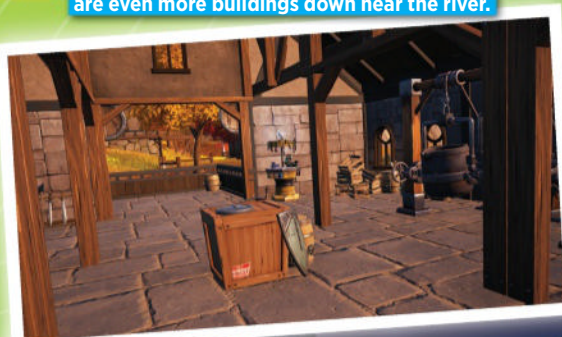

The towering levels of this mighty fortress make this an especially difficult area to traverse. And, as with most of the larger POIs, there isn't much loot to be found here. It's best to avoid the area until you're ready to fight the resident boss.

THE CITADEL

This is one of the most contested areas on the new island, but that doesn't mean it's a good place to land. Steer clear if you're playing solo.

FORTRESS FORAGING

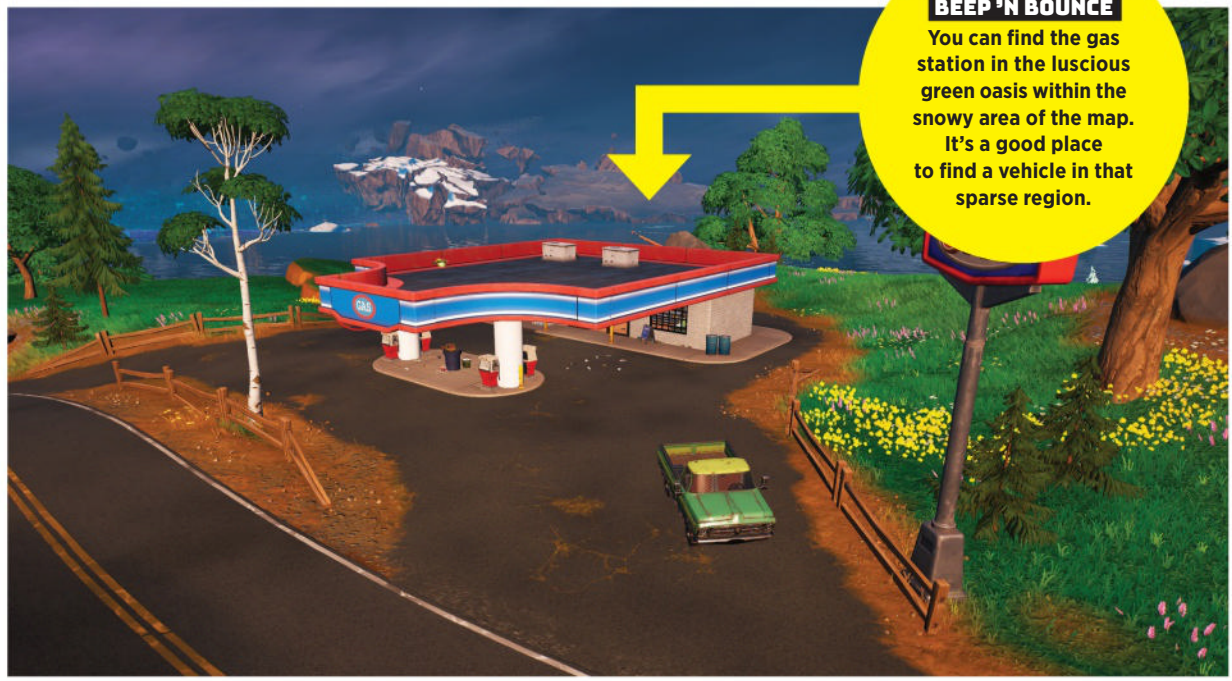

The Citadel is absolutely gigantic. The main structure is enough of a beast to loot, and there are even more buildings down near the river.

BOSS BATTLE

On the bottom level, you'll find The Ageless, the Season's boss. Players rush to the area for a chance at obtaining his Exotic weapon, but we prefer to take our time and thoroughly prepare for the brutal showdown.

NEW LOCATIONS

BEEP 'N BOUNCE

You can find the gas station in the luscious green oasis within the snowy area of the map.

It's a good place to find a vehicle in that sparse region.

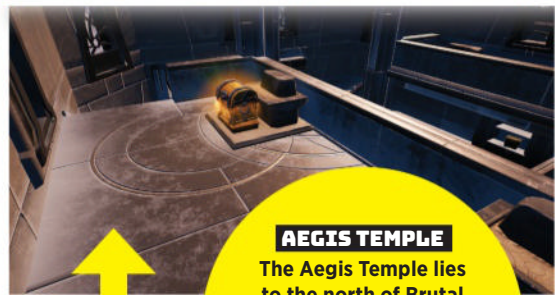

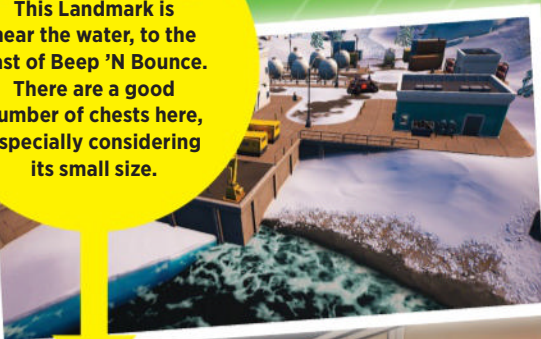

NEW LANDMARKS

There are nine POIs on this new island, but the discoveries don't end there—dozens of interesting and bountiful landmarks are scattered around the map. Here are some of our favorites.

CRUDE HARBOR

This Landmark is near the water, to the east of Beep 'N Bounce.

There are a good number of chests here, especially considering its small size.

AEGIS TEMPLE

The Aegis Temple lies to the north of Brutal Bastion, making it a decent last-minute landing spot if the Bastion is looking too crowded.

EXILE ISLE

On the south part of the map, you'll find this tiny island. It holds a decent amount of loot, and it's a perfect place to hide out if you're avoiding combat early on.

SEASIDE SENTRY

Heading west, you can find this humble fortress. Be sure to stop in here as you search the coastline for chests.

FEUDAL FUEL

If too many players are landing on The Citadel, this little garage is a good alternative. You can find a few chests to get you started, then quickly move along.

QUADCRASHER MOTOCROSS

When you want a break from the action, locate this track in the middle of the island and take your dirt bike for a spin!

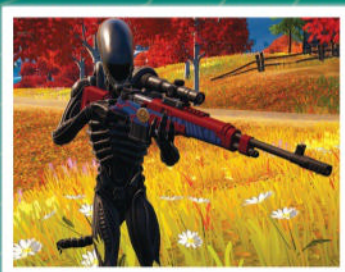

WEAPONS

There's nothing more invigorating than a new Chapter in Fortnite. Most of the guns we're used to get vaulted, and we have to adapt our gameplay style to a whole new arsenal of weapons, creating unique tactics and maneuvers to match. This Chapter is no different! We have a lot of fun options to work with, from the Ex-Caliber Rifle to the Tactical Pistol.

MARKSMAN RIFLES

DMR

The DMR is a fast-firing semi-automatic Marksman Rifle with a long-range scope. Aim high at longer ranges to accommodate for bullet drop and use the scope for better aim.
